

Assignment -4

Assignment Date	15 November 2022
Student Name	SUDHARSAN J
Student Roll Number	212219040156
Maximum Marks	2 Marks

1.Pull an Image from docker hub and run it in docker playground

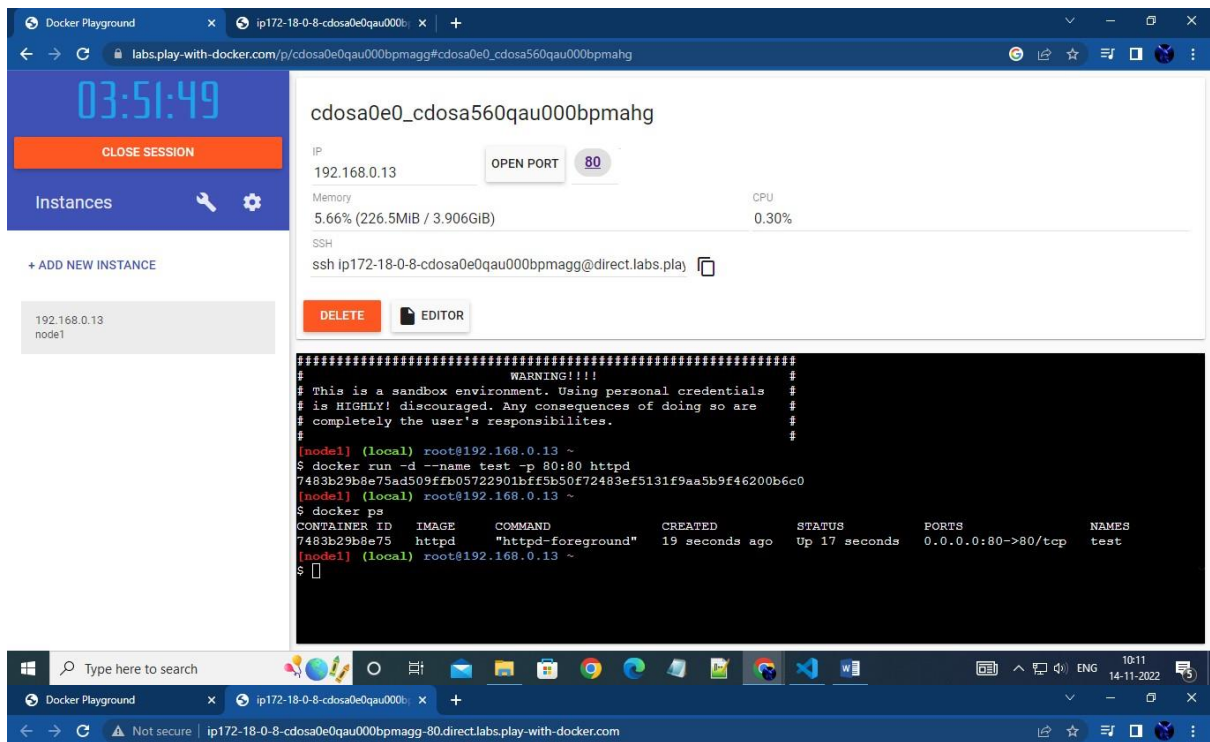

The image shows two screenshots of the Docker Playground interface, demonstrating the process of pulling a Docker image from Docker Hub.

Top Screenshot:

- The interface shows a session titled "cdosa0e0_cdosa560qau000bpmahg" with IP 192.168.0.13.
- The terminal output shows the user attempting to pull the "httpd:docimages" image, which fails with the error: "Error response from daemon: manifest for httpd:docimages not found: manifest unknown: manifest unknown".
- The user then successfully pulls the "httpd:latest" image, which is pulled from the library/httpd repository. The output shows the image ID "e9995326b091" and the size "145MB".

Bottom Screenshot:

- The interface shows the same session with IP 192.168.0.13.
- The terminal output shows the user running the command "docker images", which lists the pulled image: "httpd latest fe8735c23ec5 2 weeks ago 145MB".

It works!

2. Create a docker file for the jobportal application and deploy it in Docker desktop application.

```

PS C:\Users\RIT\Desktop\job-portal-master> docker run -d -it --rm --name jp-mongodb -p 27017:27017 -e MONGO_INITDB_ROOT_USERNAME="root" -e MONGO_I

4. Create a Kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodepor

The screenshot shows the IBM Cloud Kubernetes cluster overview page for 'mycluster-01'. The cluster is in a 'Normal' state and expires in 30 days. The overview includes a sidebar with links to Overview, Worker nodes, Worker pools, and DevOps (marked as 'New'). The main content area displays a warning about the 30-day expiration and four status cards: Node status (1 of 1, Normal), Add-on status (0 of 0, Normal), Master status (Normal), and Ingress status (Unknown). Below these is a 'Details' section with a table of cluster information.

Cluster ID	Version	Infrastructure	Zones
cdouf2ef09uaonn50h60	1.24.7_1542	Classic	Milan 01

Created	Resource group	Image security enforcement
11/14/2022, 12:30 PM	Default	<button>Disable</button>

The screenshot shows the Kubernetes Deployments page for 'app: sample-app'. The left sidebar lists various Kubernetes resources. The main content area shows annotations, resource information, and the rolling update strategy.

Annotations: deployment.kubernetes.io/revision: 1, kubectrl.kubernetes.io/last-applied-configuration

Resource information:

Strategy	Min ready seconds	Revision history limit
RollingUpdate	0	10

Selector: app: sample-app

Rolling update strategy:

Max surge	Max unavailable
25%	25%

The screenshot shows the Kubernetes Pods page for 'app: sample-app'. The left sidebar lists various Kubernetes resources. The main content area shows labels and resource information for the pods.

Labels: app: sample-app, pod-template-hash: d9bfd84d9

Resource information:

Node	Status	IP	QoS Class	Restarts	Service Account
docker-desktop	ImagePullBackOff	10.1.1.0.48	BestEffort	0	default
